(54) Title: APPARATUS AND METHOD FOR FACILITATING MALE ORGASM

(57) Abstract: A male masturbation device and method for using same facilitates orgasm without the necessity of the subject achieving an erection. The novel device comprises a housing and accumulator means. The accumulator means maintains a consistent modest vacuum within the housing notwithstanding sliding of the penis within the housing. The accumulator means can be integrated with the housing or detached from but in fluid communication with the housing. The device may be used with or without a partner and its use may be augmented by sensory stimulation contrivances. The novel device and method offers the health and recreational benefits of orgasm, and facilitates semen collection, for individuals suffering ED, without resort to drugs or vacuum erection devices. The novel device takes advantage of the fact that an erection is not required for orgasm, however, users may experience an erection prior to ejaculation.

INTERNATIONAL SEARCH REPORT

PCT/ISA/210 (second sheet) (July 2009)

Date

"P" than filing special document earlier or the date of actual completion of the international search

"O" document referring to an oral disclosure, use, exhibition or other means
document published prior to the international filing date but later than the priority date claimed

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"E" earlier application or patent but published on or after the international filing date

"A" document defining the general state of the art which is not considered to be of particular relevance

Special categories of cited documents:

See patent family annex.

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"Y" document of particular relevance; the claimed invention cannot be considered a patent application to involve an inventive step when the document is taken alone

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step, even where the document is referred to in the international search report

"&" document member of the same patent family

Date of mailing of the international search report

18 APRIL 2012 (18.04.2012)

Date of the actual completion of the international search

18 APRIL 2012 (18.04.2012)

Form PCT/ISA/210 (second sheet) (July 2009)

A. CLASSIFICATION OF SUBJECT MATTER

A61F 5/41(2006.01)i, A61H 19/00(2006.01)1, A61H 7/00(2006.01)1

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

A61F 5/41; A61F 6/10; A61F 5/00; A61H 7/00

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Korean utility models and applications for utility models

Japanese utility models and applications for utility models

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
eKOMPASS (KIPO internal)

C. DOCUMENTS CONSIDERED TO BE RELEVANT
