I-20123 Milan(IT)

Device for dispensing fluid, particularly useful in the field of hairdressing.

The device (1) comprises a box-like structure (3) wherefrom protrude a plurality of bristles (8), having formed therein hollow portions terminating in outwardly opening holes, (17,18). The box-like structure (3) defines on its interior

a vessel, closeable by a cover (7), adapted for containing fluid and communicating with the hollow portions of the bristles (8), such that fluid contained in the vessel may be dispensed through the holes (17,18).
