(54) **Dust collector and vacuum cleaner**

(57) A vacuum cleaner is provided. The vacuum cleaner includes a main body, a dust separator, a press member, and a driving apparatus. The main body includes a suction device generating air suctioning force. The dust container is detachably coupled to the main

body and includes a dust storage part storing dust. The press member decreases a volume of the dust stored in the dust storage part. The driving apparatus makes the press member to move automatically.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 08 16 0041

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
