(54) Titre : COMMUNICATION ENTRE DOMAINES
(54) Title: INTER-DOMAIN COMMUNICATION

(57) **Abrégé/Abstract:**

A computer-implemented method for performing inter-domain communication in a web browser includes receiving first data from a first domain at a router associated with one or more domains other than the first domain, identifying at the router the one or more domains for receiving data associated with the received data, and transmitting second data associated with the received data to the one or more domains.
