UNITED STATES PATENT OFFICE.

HARRY THAYER KINGSBURY, OF KEENE, NEW HAMPSHIRE.

DESIGN FOR A BODY-BLANK FOR TOY WAGONS.

SPECIFICATION forming part of Design No. 32,973, dated July 17, 1900.

Application filed June 14, 1900. Serial No. 20,367. Term of patent 14 years.

To all whom it may concern:

Be it known that I, HARRY THAYER KINGSBURY, a citizen of the United States, residing at Keene, in the county of Cheshire, State of New Hampshire, have invented and produced a certain new and useful Design for a Body-Blank for Toy Wagons, of which the following is a description, reference being had to the accompanying drawing and to the letters of reference marked thereon.

My invention relates to a new and original design for a body-blank for toy wagons; and it consists in a blank of the shape and configuration hereinafter described and illustrated in the accompanying drawing, in which the figure represents a plan view of a toy-wagon body-blank embodying my design.

In the drawing, A represents the blank as a whole, having on its rear edge upon opposite sides the projecting ears *a*, having perforations *b*, and having the central projecting portion *c*. The opposite edge is provided

with the projecting ears *d* and the central projecting piece B, having the straight forward edge *e* and the curved side edges *f*, and has the elongated slots *g*. Extending across the division-line of the body portion A and projecting portion B are elliptical or other shaped openings *h*, while in the body portion A are elongated openings *i i*. The opposite sides of the central body portion A are provided with projecting ears *k* and a series of rectangular openings *l*.

Having thus described my invention, what I claim, and desire to secure by Letters Patent, is—

The design for a body-blank for toy wagons; substantially as shown and described.

In testimony whereof I affix my signature in presence of two witnesses.

HARRY THAYER KINGSBURY.
