(54) **Title:** CONTROL ARRANGEMENT AND METHOD FOR CONTROLLING AN ENERGY LOAD

FIG 1

(57) **Abstract:** A control arrangement is provided with: a transmitting device (10) and a receiving device (20). The receiving device (20) has a receive unit (5), a control device (6), and an energy consumer (7) and the transmitting device (10) has an energy converter (2), which converts primary energy into electrical energy, and a supplying device (12, 13; 18), which supplies the primary energy to the energy converter, and a transmit unit (3). The converted energy is provided for operating the transmit unit, which transmits information to the receiving device, and wherein the supplying device can be activated by means of a key device (11) and the receiving device (5) is connected to the control device (6) and the energy load (7), such that the control device (6) controls the energy consumption of the energy load (7) based on the reception of the information.

A. CLASSIFICATION OF SUBJECT MATTER

INV. G01D4/00 H01H27/00 G08C17/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

H01H H05B G08C

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *G* document member of the same patent family
