(54) **Title:** WIRELESS DATA CARD**Fig. 1**

(57) **Abstract:** Embodiments of a method and a wireless data card (104) to display information on a display (202) of the wireless data card (104) are described. According to one embodiment, the method comprises determining a total amount of data exchanged between the wireless data card (104) and a service provider (110) for a pre-determined time period. The determined total amount of data exchanged is further displayed on the display (202) of the wireless data card (104). In one embodiment, the size of at least one data packet sent by the wireless data card (104) and the size of at least one data packet received by the wireless data card (104) within the pre-determined time period is ascertained to determine the total amount of data exchanged.
