The ornamental design for a shielded medical connector, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a shielded medical connector showing my new design;
FIG. 2 is a perspective view thereof showing an opposing side;
FIG. 3 is a front view thereof, the rear view being a mirror image;
FIG. 4 is a right-side view thereof, the left-side view being a mirror image;
FIG. 5 is a top view thereof;
FIG. 6 is a bottom view thereof;
FIG. 7 is a sectional view through the section 7-7 of FIG. 5; and,
FIG. 8 is a sectional view through the section 8-8 of FIG. 6.

The evenly spaced broken line depiction of the medical-fluid delivery device represents the medical-fluid delivery device with which the design may be associated and forms no part of the claimed design. The underside of my new design contains no ornamental features and is not directly visible when integrated with the medical-fluid delivery device.
