Silver halide color photographic material.

A silver halide color photographic material having at least one silver halide emulsion layer on a support, wherein said emulsion layer contains a development inhibitor-releasing coupler represented by following formula (I);

wherein R₁ represents a hydrogen atom, a halogen atom, an alkyl group, an aryl group, a heterocyclic group, a cyano group, a hydroxy group, a nitro group, a carboxy group, an amino group, an alkoxy group, an aryloxy group, an acylamino group, an alkylamino group, an anilino group, a ureido group, a sulfamoylamino group, an alkylthio group, an arylthio group, an alkoxycarbonylamino group, a sulfonamido group, a carbamoyl group, a sulfamoyl group, a sulfonyl group, an alkoxycarbonyl group, a heterocyclic oxy group, an azo group, an acyloxy group, a carbamoyloxy group, a silyloxy group, an aryloxycarbonylamino group, an imido group, a heterocyclic

thio group, a sulfonyl group, a phosphinyl group, an aryloxy carbonyl group, an aryl group, or an azolyl and when R_1 is a divalent group, the coupler may form a bis compound at the divalent group; Z_1 and Z_2 each represents a nitrogen atom or $=C-R_2$ (wherein R_2 has the same meaning as R_1) and when Z_1 and Z_2 are both

two R_2 s may be the same or different; X represents

(wherein * represents a group bonding to the left side of X; ** represents a group bonding to the right side of X; R_{31} and R_{32} have the same meaning as R_1 ; and R_{33} represents an alkyl group, an aryl group, an acyl group, an alkoxy carbonyl group, a carbamoyl group, a sulfonyl group, or a sulfamoyl group); L represents a group of cleaving the bond of the right side [the bond to $(B)_m$] after cleaving the left side of L; B represents a group of cleaving the bond at the right side of B by reacting with the oxidation product of a color developing agent; DI represents a development inhibitor; m and n each represents 0 or 1 with the exclusion that m and n are simultaneously 0; and p represents 1 or 2 and when p is 2, two $[(L)_m-(B)_n]$ s may be the same or different.
