CLAIM

The ornamental design for a face panel for a CPCI board, as shown and described.

DESCRIPTION

The design consists of the ornamental shape of a face panel for a CPCI board of a computer system. The face panel is the portion of the CPCI board that remains visible after the CPCI board is fully inserted into a slot of a computer system. Surfaces behind the face panel are not a part of the design.

FIG. 1 is a perspective view of the face panel for a CPCI board with the swiveling handle in an extended position, viewed from a position to the left of the face panel, with the portion shown in broken line forming no part of the claimed design.

FIG. 2 is a plan view of the face panel for a CPCI board with the swiveling handle in an extended position.

FIG. 3 is a perspective view of the face panel for a CPCI board with the swiveling handle in an extended position, viewed from a position to the right of the face panel.

FIG. 4 is a perspective view of the face panel for a CPCI board with the swiveling handle in a folded position, viewed from a position to the left of the face panel, with the portion shown in broken line forming no part of the claimed design.

FIG. 5 is a plan view of the face panel for a CPCI board with the swiveling handle in a folded position; and,

FIG. 6 is a perspective view of the face panel for a CPCI board with the swiveling handle in a folded position, viewed from a position to the right of the face panel.
