CLAIM

The ornamental design for a display screen for electronic device with taking lens, as shown and described.

DESCRIPTION

FIG. 1 is a top, rear and left side perspective view of a digital camera having a display screen;

FIG. 2 is a front elevational view thereof;

FIG. 3 is a rear plan view thereof;

FIG. 4 is a top plan view thereof;

FIG. 5 is a bottom plan view thereof;

FIG. 6 is a left side elevational view thereof;

FIG. 7 is a right side elevational view thereof;

FIG. 8 is an enlarged view of the display screen of the embodiment, in which a taking lens is in an out-of-focus state;

FIG. 9 is an enlarged view of the display screen of the embodiment, in which the taking lens is in an in-focus state, and a borderline between sub-areas is invisible;

FIG. 10 is an enlarged view of the display screen of the embodiment in use, in which the taking lens is in an out-of-focus state; and,

FIG. 11 is an enlarged view of the display screen of the embodiment in use, in which the taking lens is in an in-focus state.

The portions of the display screen for electronic device with taking lens in broken lines are shown for illustrative purposes only and form no part of the claimed design.
