(54) **Title:** REMOTE TRACKING AND COMMUNICATION DEVICE

(57) **Abstract:** A remote tracking and communication device is described and includes a housing which encloses a processor, a memory, a position locator, a first transmitter, and a second transmitter. Each of the latter components are electronically coupled to the processor. Both the first and second transmitters are adapted to send and receive wireless voice and data signals in a digital format. The device further comprises a first battery, which is removably affixed to the housing and electronically coupled to each component within the housing, a speaker and a microphone electronically coupled to the first transmitter, and a button electronically coupled to the processor. When pressed, the button is adapted to activate voice communications with a call center using the first transmitter.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"T" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
