(54) **Title:** USER DEFINED NAMES FOR DISPLAYING MONITORED LOCATION

(57) **Abstract:** A user's location may be tracked by tracking a device associated with the user. The user's location may be published (e.g. on a website) using a user defined name or some other name that is not related to the coordinates of the location based on the tracked location of the device. If published to a website, the name may be uploaded to the website in a user-editable area of the website, which area may or may not be directed to tracking the location of the user. The device may also be configured to trigger reminders based on whether the device is leaving an area and/or based on whether the device is approaching a location based on the location's membership in a class of locations (e.g. approaching a grocery store).
