Title: MOBILE DIGITAL VIDEO RECORDERS

Abstract: With mobile devices and computers coming together and being internet-ready, there is tremendous potential for improved content-delivery mechanisms. What external Digital Video Recorders (DVR) and set-top boxes have done for traditional television industry, a similar set up is proposed to do the same for mobile devices. The fusion of a DVR and a mobile phone points to the future of mobile entertainment, with mobile users being able to watch, listen to, record, and share entertainment and informative multimedia content at any time and place.
