(54) Title: SYSTEM FOR GROUP SUPERVISION

FIG. 9

(57) Abstract: A system includes one or more computer systems configured to receive a plurality of information streams from a corresponding plurality of client systems that have a defined geographic position, analyze the information feeds, generate messages based on the analysis of the information feeds, generate positional information associated with the messages, and generate a set of informational depictions of the generated messages, with the informational depictions of the messages when rendered on a display device are rendered in juxtaposition with representations of the client systems according to the generated positional information.
