(57) **ABSTRACT**

(76) **Inventor: Hsin-Li LIN, Yonghe City (TW)**

A multi-layered decorative pull flower includes at least two plate-shaped objects which are overlapped with each other and each of which is provided with a rope. Moreover, a fixing element is provided between the plate-shaped objects and a user can pull the ropes, allowing the pull flower to form a pre-determined shape of ribbon flower. Besides, each plate-shaped object is provided respectively with a different color zone. By the aforementioned structures, when pulling the ropes to form the ribbon flower shape, as each plate-shaped object can be a different material and different color zone, the user can have multiple enjoyments of the enriched colors.

## MULTI-LAYERED DECORATIVE PULL FLOWER

### BACKGROUND OF THE INVENTION

[0001] a) Field of the Invention

[0002] The present invention relates to a decorative pull flower, and more particularly to a multi-layered decorative pull flower which is provided with plural layers and is enriched with beautiful colors.

[0003] b) Description of the Prior Art

[0004] A party site will be usually deployed with ribbon flowers to serve as decorations for creating mood, for example, windows or doors are surrounded with the ribbon flowers to achieve the joyful mood.

[0005] Although the conventional ribbon flowers are usually provided with all kinds of styles, these ribbon flowers are more complicated and will cost too much if a mass production is needed; therefore, it is not very easy to produce the ribbon flowers in a large quantity. Accordingly, a vendor has developed a ribbon flower of simple structure. This ribbon flower includes at least two plate-shaped objects which are overlapped with each other and each of which is provided with a rope. In addition, a fixing element is provided between the plate-shaped objects and a user can pull the ropes, allowing the pull flower to form a pre-determined shape of ribbon flower.

[0006] However, when the aforementioned ribbon flower is used, following issues and shortcomings actually exist to be improved.

[0007] Although the ribbon flower of simple structure was available and the mass production was able to be carried out, this ribbon flower is provided with fewer variations and will be usually too monotonous in a place of use.

[0008] Accordingly, how to solve the aforementioned issues and shortcomings of the prior art is a direction of research and development for improvement by the present inventor and related vendors.

### SUMMARY OF THE INVENTION

[0009] The primary object of the present invention is to provide a decorative pull flower which is multi-layered and enriched with beautiful colors.

[0010] To achieve the aforementioned object, the pull flower of the present invention includes at least two plate-shaped objects which are overlapped with each other and each of which is provided with a rope. Moreover, fixing elements are provided between the plate-shaped object and a user can pull the ropes, allowing the pull flower to form a pre-determined shape of ribbon flower. Each plate-shaped object is provided respectively with a different color zone, such that when the user pulls the ropes to form the ribbon flower shape, he or she can have multiple enjoyments of the multiple layers and enriched colors.

[0011] To enable a further understanding of the said objectives and the technological methods of the invention herein, the brief description of the drawings below is followed by the detailed description of the preferred embodiments.

### BRIEF DESCRIPTION OF THE DRAWINGS

[0012] FIG. 1 shows a three-dimensional schematic view of a preferred embodiment of the present invention.

[0013] FIG. 2 shows a three-dimensional exploded view of the preferred embodiment of the present invention.

[0014] FIG. 3 shows a first schematic view of an implementation of the preferred embodiment of the present invention.

[0015] FIG. 4 shows a second schematic view of an implementation of the preferred embodiment of the present invention.

[0016] FIG. 5 shows a third schematic view of an implementation of the preferred embodiment of the present invention.

[0017] FIG. 6 shows a fourth schematic view of an implementation of the preferred embodiment of the present invention.

### DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENTS

[0018] Referring to FIG. 1 and FIG. 2, it shows a three-dimensional schematic view and a three-dimensional exploded view, of a preferred embodiment of the present invention. As shown in the drawings, the pull flower 1 of the present invention comprises at least two plate-shaped objects 11 which are overlapped with each other and each of which is provided with a rope 12. In addition, fixing elements 13 are provided between the plate-shaped objects 11 and a user can pull the ropes 12, allowing the pull flower 1 to form a pre-determined shape of ribbon flower. Moreover, each plate-shaped object 11 is provided respectively with a different color zone 14 which can be red, orange, yellow, green, blue, cyan or purple, such that when the user pulls the ropes 12 to form the ribbon flower shape, he or she can have multiple enjoyments of the enriched colors.

[0019] Referring to FIGS. 3 to 6 at a same time, it shows a first to fourth schematic views of an implementation of the preferred embodiment of the present invention. As shown in the drawings, the present invention includes at least two plate-shaped objects 11, wherein there are six plates in the drawings and each plate-shaped object 11 has three plates which are overlapped with one another (as shown in FIG. 3). In addition, each plate-shaped object 11 is provided respectively with the different color zone 14 and the rope 12, such that when the user is to use the pull flower 1 of the present invention, he or she can pull the ropes 12 in the plate-shaped objects 11, allowing the pull flower 1 to form the ribbon flower shape. On the other hand, as the present invention is provided with six plate-shaped objects 11, when the pull flower 1 is pulled open (as shown in FIG. 4), the user can use a hand to toggle each plate-shaped object 11, allowing each plate-shaped object 11 to be staggered respectively (as shown in FIG. 5), thereby forming a shape of multi-layered ribbon flower. Furthermore, each plate-shaped object 11 is provided with the different color zone 14, when the user toggles apart each plate-shaped object 11, he or she can have the multiple enjoyments of enriched colors (as shown in FIG. 6).

[0020] Moreover, each plate-shaped object 11 can be also made by a different material to increase variations of the pull flower 1.

[0021] Referring to all the drawings, the present invention is actually provided with following advantages when compared with the prior art.

[0022] The pull flower 1 of the present invention includes at least two plate-shaped objects 11 which are overlapped with each other, such that when the user pulls the ropes 12 to form the ribbon flower shape, he or she can use the hand to toggle each plate-shaped object 11, allowing the pull flower 1 to have an aesthetic feeling of multiple layers. Besides, as each plate-shaped object 11 is provided respectively with the different

color zone **14**, when the user toggles apart each plate-shaped object **11**, he or she can have the multiple enjoyments of enriched colors.

**[0023]** It is of course to be understood that the embodiments described herein is merely illustrative of the principles of the invention and that a wide variety of modifications thereto may be effected by persons skilled in the art without departing from the spirit and scope of the invention as set forth in the following claims.

What is claimed is:

**1.** A multi-layered decorative pull flower comprising at least two plate-shaped objects which are overlapped with

each other and each of which is provided with a rope, with a fixing element being provided between the plate-shaped objects, such that a user pulls the rope, allowing the pull flower to form a pre-determined shape of ribbon flower; each plate-shaped object being provided respectively with a different color zone, such that when the user pulls the ropes to form the ribbon flower shape, he or she is provided with multiple enjoyments of the enriched colors.

**2.** The multi-layered decorative pull flower according to claim **1**, wherein the color zone is red, orange, yellow, green, blue, cyan or purple.
