(54) Title: ADMINISTRATION OF CONTENT CREATION AND DISTRIBUTION SYSTEM

(57) Abstract: Methods, systems, and apparatus, including computer programs encoded on a computer storage medium, for receiving and distributing user-generated video content. In one aspect, a method includes displaying an administrator user interface identifying a plurality of videos available for selection, where each of the videos includes user-generated video content received from a user computing device. A selection of one of the plurality of videos for inclusion in a linear television programming transmission is received through the administrator user interface. A file including the selected video is stored for retrieval and inclusion in the linear television programming transmission.
