(54) Title: METHODS, MOBILE USER TERMINAL AND SYSTEM FOR CONTROLLING ACCESS TO MOBILE USER TERMINAL LOCATION INFORMATION

(57) Abstract: Access to mobile user terminal location information can be controlled by receiving a request from a requestor (205, 405, 505, 605, 805) for location information associated with the location of the mobile user terminal (201, 401, 501, 601, 801) at a location server (225, 423, 523, 640, 840) that maintains the location information. The location server (225, 423, 523, 640, 840) determines whether the requestor (205, 405, 505, 605, 805) authorized to receive the location information from the location server (225, 423, 523, 640, 840). The location server (225, 423, 523, 640, 840) transmits an authorization that allows the requestor (205, 405, 505, 605, 805) to receive the location information from the location server (225, 423, 523, 640, 840) in response to determining that the requestor (205, 405, 505, 605, 805) is authorized to receive the location information from the location server (225, 423, 523, 640, 840).
