Passed Dec 10 1872

UNITED STATES PATENT OFFICE.

JOHN C. DUEBER, OF CINCINNATI, OHIO.

DESIGN FOR A WATCH-CASE.

Specification forming part of Design No. **6,282**, dated December 10, 1872.

To all whom it may concern:

Be it known that I, JOHN C. DUEBER, of Cincinnati, Hamilton county, Ohio, have invented and produced a new and original Design for a Watch-Case, of which the following is a specification:

The nature of my design is fully represented in the accompanying illustration, to which reference is made, and in which—

Figure 1 is a front elevation of a watch-case embodying my design, and Fig. 2 is a side elevation of the same.

The first part of my invention relates to that portion of the case known as the center, which, instead of being provided with beads or ribs where the two hinged members meet, has the represented uniform convex surface, as shown at A, so as to present a "bassine" finish. The second part of my invention consists in providing the "bezel" B with "knurls"

b, that may have the represented "pearl" finish, or they may be star-shaped. The back C is also provided with "knurls" c. The third part of my invention consists in imparting to the head D of the pendant the hexagonal shape, as shown.

Claims.

I claim as my invention—

1. The knurls *b* and *c* upon the "bezel" and "back," respectively, as shown.
2. The design for the head of the pendant, as shown at D.

In testimony of which invention I hereunto set my hand.

JOHN C. DUEBER.
