Title: A METHOD TO ACCESS AND USE AN INTEGRATED WEB SITE IN A MOBILE ENVIRONMENT

Abstract: A method to access and use an integrated web site from a mobile environment is disclosed. The method includes communicating voice activated commands, using voice recognition technology, to an integrated web site via a wireless communication network and a global informational network. The integrated web site comprises a network-based media station integrated with a global search engine. The voice activated commands are used to access the integrated web site, initiate the transmission of streaming digital media content from the media station to a wireless mobile network terminal, and perform key word searches of the global informational network using the global search engine.
