(54) Title: CONFIGURABLE WAGERING GAME MANAGER

(57) Abstract: Methods and systems for monitoring and/or servicing wagering game machines are described herein. In one embodiment, a method includes receiving a request to configure wagering game manager content, wherein the request is associated with a user identifier. The method can also include transmitting another request and the user identifier, and receiving and presenting configuration options, where the configuration options determine from which of a plurality of application servers that services can be requested. Additionally, in some embodiments, the configuration options determine separate modules for presenting information about the services. The method can also include receiving one or more configuration selections associated with the configuration options.
