(54) Title: LEG MASSAGE AND EXERCISE DEVICE

(57) Abstract: A massage and exercise device includes a main body provided with a supporting groove in which a calf of a leg can be disposed, a sliding member slidably inserted into the main body, a first massager for massaging the calf, and a controller for controlling the first massager. The first massager is installed on a rear side of the supporting groove and includes an electric motor, a power transmission device for converting a rotational motion of the motor into a reciprocal motion, and a first massage member for massaging the calf while moving along the supporting groove. The first massage member is fixed on the power transmission device. An exercise device is provided on the sliding ember.
