The ornamental design for a monitor pop-up display unit for a seat in the passenger compartment of an aircraft, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a monitor pop-up display unit for a seat in the passenger compartment of an aircraft comprising the present invention, showing the monitors rotated at an oblique angle relative to the pop-up unit;

FIG. 2 is a top view of the monitor pop-up display unit for a seat in the passenger compartment of an aircraft shown in FIG. 1, wherein the monitors are rotated to be essentially perpendicular to the pop-up unit;

FIG. 3 is a front view of FIG. 2;

FIG. 4 is a rear view of FIG. 2;

FIG. 5 is a right side view of FIG. 2; the left side being a mirror image and,

FIG. 6 is a bottom view of FIG. 2.
