(54) **Title:** PARENT PLAYBACK

Figure 2

(57) **Abstract:** A persistent software system and method for allowing parents or persons responsible for children to record and playback a child's activities on a web based system. A playback software utility implemented as a web-service or as an embedded web-based system to record all user activities and support playback as if the user's activity was recorded in real-time. This invention consists of a set of recording and playback software scripts that can be executed via a web service or can reside on a service requesting web based system. The invention consists of a player that allows for the recorded activity to be played back either on the web based system that requested the service or a third party application.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
