UNITED STATES PATENT OFFICE.

HENRY B. SCHWARTZENGRABER AND CHARLES C. BLISS, OF DELPHOS,
OHIO.

DESIGN FOR A WIRE-FENCE BLOCK.

SPECIFICATION forming part of Design No. 19,482, dated December 10, 1889.
Application filed October 31, 1889. Serial No. 328,848. Term of patent 14 years.

To all whom it may concern:

Be it known that we, HENRY B. SCHWARTZENGRABER and CHARLES C. BLISS, citizens of
the United States, and residents of Delphos, in the county of Allen and State of Ohio, have
invented certain new and useful Designs for Wire-Fence Blocks; and we do declare the
following to be a full, clear, and exact description of the invention, such as will en-
able others skilled in the art to which it appertains to make and use the same, reference
being had to the accompanying drawing, and to letters of reference marked thereon, which
form a part of this specification.

The drawing is a representation of this invention, and is a perspective view.

This invention has relation to designs in connection with wire fencing; and it consists
in the novel form and configuration of the parts, as hereinafter set forth.

In the accompanying drawing, the letter A designates blocks or plates having upper and
lower dovetailed portions B proceeding vertically in opposite directions from the middle
or central line, so that the margins or sides C are re-entrant, as shown.

What we claim as our invention is—
The design for wire-fence blocks, consisting of the block shown formed with dovetailed
upper and lower portions and lateral re-entrant margins, the inner contracted ends of
said portions meeting each other and centrally of the block, as set forth.

In testimony whereof we affix our signatures in presence of two witnesses.

H. B. SCHWARTZENGRABER.
CHAS. C. BLISS.
