(54) Gas ring for a cooking range

(57) A gas ring (1), used in combination with pans (29) for cooking food, has a gas fitting (3); a gas distribution chamber (2a); and a number of nozzles (11,12,25,26;12,26) communicating with the gas distribution chamber (2a), which is located solely inside a pipe (2) extending along a path (P); and the nozzles

(11,12,25,26;12,26) are distributed solely along the pipe (2).

The path may have different shapes: a ring, circular or elliptical, C-shaped or S-shaped.

The gas ring (1) may have top protrusions (27) for support of a pan or a pot, and bottom protrusions (4) for transmitting the forces of pan and ring onto the range.

EP 04 10 1576

CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing more than ten claims.

- ☐ Only part of the claims have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid, namely claim(s):
- ☐ No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

see sheet B

- ☐ All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.
- ☐ As all searchable claims could be searched without effort justifying an additional fee, the Search Division did not invite payment of any additional fee.
- ☐ Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:
- ☒ None of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims:

1-9, 12-22

European Patent
Office

LACK OF UNITY OF INVENTION
SHEET B

Application Number
EP 04 10 1576

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. claims: 1-9, 12-22

A gas ring for a cooking range, with top projections acting as support for a pan, the projections being offset slightly laterally from the nozzles. and with bottom projections. The resulting effect is, that the weight of the pan is directly transmitted to the range via these projections.

2. claim: 10

A gas ring for a cooking range, the gas fitting being located directly beneath the gas pipe. The resulting effect is, that there is a larger amount of mounting possibilities of the flame rings on the range, and manufacturing cost can be reduced.

3. claim: 11

A gas ring for a cooking range, the cross section of the gas distribution chamber varying gas fitting being located directly beneath the gas pipe. The resulting effect is, that the gas discharge is equal at every nozzle, independent on how far it is located from the gas inlet into the distribution ring.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 04 10 1576

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
