UNITED STATES PATENT OFFICE.

HENRY BROUSE, OF WELLINGTON, OHIO.

IMPROVEMENT IN GATES.

Specification forming part of Letters Patent No. 126,928, dated May 21, 1872.

SPECIFICATION.

To all whom it may concern:

Be it known that I, HENRY BROUSE, of Wellington, in the county of Lorain, in the State of Ohio, have invented certain Improvements in Farm-Gates; and do hereby declare that the following description, taken in connection with the accompanying plate of drawing hereinafter referred to, forms a full and exact specification of the same, wherein I have set forth the nature of my said improvements, by which my invention may be distinguished from others of a similar class, together with such parts as I claim and desire to secure by Letters Patent.

My invention relates to that class of gates known as farm-gates; and the nature thereof consists in certain modifications in the details of the construction of the same, hereinafter described and shown.

In the accompanying plate of drawing, which illustrates my invention, and forms a part of the specification thereof, Figure 1 is a front elevation of my improved gate. Fig. 2 shows the position and relative arrangement of parts of the gate when open.

The construction, operation, and relative arrangement of parts of my invention may be described as follows:

In the drawing, letter A designates a gate provided with a sweep-weight, B. The said gate rests on and is secured to the posts C and D. Upon the top of the longer post, and revolving thereon, is the swivel E, within which revolves the roller F, upon which rests the upper bar of the gate. The other end of the said bar rests in the slot H cut in the upper end of the short post C. One end of the lower bar of the gate rests in a slot, I, cut in the lower part of the short post.

Having thus described the construction and operation of my invention, I claim and desire to secure by Letters Patent—

The combination of the gate A, post D provided with the swivel E, and post C provided with the slots H and I, as above described.

In witness whereof I have hereunto subscribed my name the 10th day of February, 1872.

Witnesses: HENRY BROUSE.
