UNITED STATES PATENT OFFICE.

CHARLES A. BAILEY, OF CROMWELL, CONNECTICUT.

DESIGN FOR A TOY STOVE.

SPECIFICATION forming part of Design No. 24,519, dated July 30, 1895.

Application filed June 26, 1895. Serial No. 554,147. Term of patent 3½ years.

To all whom it may concern:

Be it known that I, CHARLES A. BAILEY, a citizen of the United States, residing at Cromwell, in the county of Middlesex and State of Connecticut, have invented and produced a new and original Design for Toy Stoves, of which the following is a specification, reference being had to the accompanying drawings, illustrating the same, in which—

Figure 1 is a representation of an elevation of the front side of the stove. Fig. 2 is an elevation of the rear side of the same. Fig. 3 is a front elevation of the stove, and Fig. 4 a rear elevation thereof.

This invention has relation to a certain new and original design for stoves, and it consists in the novel form and configuration of parts, all as hereinafter described and illustrated in the accompanying drawings.

Referring to the drawings, it will be observed that the general form of the body A as viewed in side and elevation and in plan, is rectangular, with a depending curtain-flange B at the base and an overhanging top plate.

The rear portion C of the body when viewed in plan forms an even continuation of the body, but when viewed in side elevation is seen to form an offset from the base, its bottom line or wall having an upward curve. At the opposite end of the body is a horizontal hearth projection H, having a flat surface and slightly beveled lateral and front edges.

The "hot oven" O, arranged on the top of the body A, as shown, presents a general T shape or outline, having the upright portion *o* and rectangular upper body portion *o'*.

The curtain-flange B extends entirely around the base, and has a leg extension B^1 at each angle. Said flange is ornamented upon its upper narrow band *b* by a raised vine and flower figure, the vine running alternately above and below the representations of the flowers. The main body of the curtain-flange B is ornamented on each side and end of the stove by a central oval or disk and a running vine with leaves and flowers, as shown.

The front side of the stove, above the curtain-flanges, has a raised figure *d* thereon, below its small door D, and above this figure and below the door is a raised bar *e*. The small door D is ornamented with a sunken scalloped figure F, with a raised flower figure G in the center thereof. The large or oven door I is ornamented by an intertwined vine bearing leaves and flowers, and arranged as shown, and a scroll design at the hinge end *i* of the door. The part C on this side of the stove has the rectangular projection J, ornamented with the scroll and other figures shown.

The front of the heating box or oven O on top of the body A is ornamented on its lower upright portion *o* by the scroll and leaf figures shown, while the sliding doors o^2 of its upper part are ornamented by the running leaf and flower design shown. The upper edge projection O' is ornamented with the scroll figures shown.

The rear side of the body A is ornamented by a central design K, formed of a series of blocks or raised squares, and the space L to each side of the same is ornamented by an S-shaped vine bearing leaves and flowers. The rear surface of the extension C bears a raised figure corresponding to that on the front face of said extension. The back of the upper heating oven O is ornamented with the central vertical lines, resembling a column, while to each side thereof is shown a vine figure bearing leaves and flowers.

The front end of the range has its door M, above the hearth projection H, ornamented with a vine figure somewhat resembling that on the main oven-door I, with openings below said door.

The rear end of projection C is ornamented in relief by the curved vine bearing flowers and leaves, as shown at N, and the lower curved wall of said extension has the series of parallel narrow openings *n*.

What I claim is—

The design for a stove substantially as herein shown and described.

CHAS. A. BAILEY.
