(54) Title: WIRELESS MESH NETWORKING IN WAGERING GAME ENVIRONMENTS

(57) Abstract: Systems and methods for wireless mesh networking in a gaming environment are described herein. In one embodiment, the system includes a network interface unit to wirelessly receive gaming data from ones of a plurality of components of a wireless mesh network, the network interface unit to wirelessly transmit the gaming data to others of the plurality of components of the wireless mesh network. The system also includes a memory unit to store certain of the gaming data and to store instructions for conducting wagering games and a central processing unit to perform operations based in part on the certain of the gaming data and to perform operations based on the instructions.
