UNITED STATES PATENT OFFICE.

HELENA KENDSTRÖM, OF BROOKLYN, NEW YORK.

DESIGN FOR A VELVET-SMOOTHER.

To all whom it may concern:

Be it known that I, HELENA KENDSTRÖM, a citizen of the United States, residing at Brooklyn, in the county of Kings and State of New York, have invented and produced a new and useful Design for Velvet-Smoothers, of which the following is a specification.

My invention relates to a new and useful design for a velvet-smoother, of which the following is a specification, reference being had to the accompanying drawings, forming a part thereof, in which—

Figure 1 is a perspective of a device made in accordance with my invention. Fig. 2 is a vertical longitudinal section of the same. Fig. 3 is a transverse section of the same on the line 3 3, Fig. 2.

Like numerals of reference designate like parts in the different views of the drawings.

My design comprises a pyramidal-shaped body portion 1, having a curved rectangular base 2 and converging sides 3 and 4, meeting at 5 to form a vertex. The pyramid is quadrangular; but one side is cut away to accommodate a conical spout 6, cut open at 6ª along an element and formed integral with the sides 3 of the body.

The remaining features of my design are two parallel grooved V-shaped bars 2ª, extending parallel the sides of the base 2.

The essential or material features of my design are the pyramidal body with the V-shaped ribs extending parallel to the sides of the base thereof and the conical spout.

Having described my invention, what I claim as new, and wish to secure by Letters Patent, is—

The design for a velvet-smoother, substantially as described.

In testimony whereof I have hereunto set my hand in presence of two subscribing witnesses.

HELENA X KENDSTRÖM.
