(54) Title: DRILL STRING COMPONENT FOR NOISE CONTROL DURING PERCUSSION DRILLING

(57) Abstract: Drill string components (2;18) for top hammer drilling and down-the-hole drilling for positioning between a drill rig and a drill bit including a pipe-shaped element (3;19), which is arranged for transferring only rotational movements from the drill rig to the drill bit. A vibration-damping structure (12) is arranged adjoining to at least a part of an inside (H') of the pipe-shaped element in a space (41) formed inwardly of said inside (H'). The invention also concerns a rock drilling equipment.
