(54) Title: FLOW METER WELL TOOL

FIG. 1

(57) Abstract: A flow meter well tool (200) includes a volumetric well flow meter (202) to be positioned in a wellbore (102). The volumetric well flow meter (202) includes a hollow cylindrical tubing (212) to be positioned in the wellbore (102). The tubing (212) splits well fluid through the wellbore (102) into an internal fluid through the volumetric well flow meter (202) and an external fluid through an annulus between the wellbore (102) and the volumetric well flow meter (202). The hollow cylindrical tubing (212) includes an internal portion (214), where an internal cross-sectional area of the internal portion (214) is less than an internal cross-sectional area of the hollow cylindrical tubing (212).

## INTERNATIONAL SEARCH REPORT

International application No

PCT/US2015/036377

## A. CLASSIFICATION OF SUBJECT MATTER

INV. E21B47/10

ADD.

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

E21B G01F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

EPO-Internal, WPI Data

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Further documents are listed in the continuation of Box C.

See patent family annex.

\* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&amp;" document member of the same patent family
