54 **A pinned insert and a faller.**

57 A pinned insert 114 is inserted into a bar 112 and held in place by adhesive extending around the trough 120 of the bar.

A channel 130 extends along the upper and rearward edge of a wall 118 of the bar, and a hook or lip 132 of the insert 114 extends downwardly into the channel 130. Movement of the insert 114 away from the wall 118 is prevented by abutment of the lip 132 with the channel 130.
