UNITED STATES PATENT OFFICE.

DAVID M. HAIGHT AND FRANK STROSSMAN, OF OSWEGO, ILLINOIS.

MITTEN.

SPECIFICATION forming part of Letters Patent No. 237,524, dated February 8, 1881.

Application filed November 30, 1880. (Model.)

To all whom it may concern:

Be it known that we, DAVID M. HAIGHT and FRANK STROSSMAN, of Oswego, in the county of Kendall and State of Illinois, have invented
5 a new and valuable Improvement in Mittens; and we do hereby declare that the following is a full, clear, and exact description of the construction and operation of the same, reference being had to the annexed drawings, making a part of this specification, and to the letters and figures of reference marked thereon.
10

Figure 1 of the drawings is a front view. Fig. 2 is a back view. Fig. 3 is a longitudinal section. Fig. 4 is a view of the facing. Fig.
15 5 is a perspective detail of a modification.

This invention relates to mittens; and it consists in the construction hereinafter specified.

In the use of mittens, when there is hard
20 work to be performed—such as husking corn, shucking oysters, &c.—a single thickness of material is not sufficient, and yet more than one thickness renders the article clumsy.

It is the object of this invention to overcome
25 the difficulties and defects in the use of the mittens as now constructed.

In the drawings hereto annexed, A repre-

sents a mitten of any suitable material, such as leather, canvas, or duck.

B represents a facing, which is to be quilted
30 upon the front or palm side of the mitten. This facing consists either of separate strips of material, *a*, or else a whole piece, *b*, having slits *c* cut therein and forming strips *d*. This facing is made of any suitable material, the gist
35 of the invention consisting in its being in strips, and therefore flexible and readily yielding.

This invention can be applied not only to what is ordinarily known as "mittens," but
40 also to any kind of glove.

What we claim is—

1. A mitten having a facing made in strips and quilted to the same.
2. A mitten having a facing upon its palm
45 side made in strips.

In testimony that we claim the above we have hereunto subscribed our names in the presence of two witnesses.

DAVID M. HAIGHT.
FRANK STROSSMAN.

Witnesses:

SAM HAIGH,
J. W. SHEPARD.
