(54) **Device for adjusting the shelf height within a refrigerator preservation compartment**

(57) A device for adjusting the height of shelves (12, 13) within a refrigerator preservation compartment (1), this latter comprising side walls (4) and an end wall (5), on said side walls (4) there being provided supports for supporting end projecting parts (11) of the shelves on which food to be preserved is placed, and enabling said

shelves (12, 13) to be positioned at different heights within said compartment (1). The supports are defined by pairs of support elements (10) having an elongate body (15) presenting a plurality of recesses (25) opening into a side (21) of said body (15), said recesses (25) being arranged to contain the end projecting parts (11) of the shelves (12, 13).
