(54) **Method of manufacturing and individually shaped hearing device or hearing aid**

(57) The present invention provides a method of providing input parameters for the fitting process of individually shaped or customized hearing devices by storing geometry data during the manufacturing process into data storage and selectively reading out data from this data

storage during the manufacturing and/or fitting process of the hearing device. To improve the quality and to reduce the time required for the fitting process, all the data available from the manufacturing process, e.g. the geometry data, may be used during the final fitting process at the dispenser's office.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 05 00 8109

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
