(54) **System for laying floors with rapid adjustment**

(57) Described herein is a system for laying floors allows the possibility to adjust height, flatness, alignment, slope and shape of the exposed surface during the installation directly on the support, quickly, both with manual and automated installation. It consists mainly in a floor and/or tile covering, that on its lower face, useful for

the positioning on screed and/or slab, a structure is made integral in a cable box, even of a cubic form, filled with the adhesive for flooring, and on the bottom surface there is a hole that allows the release of the adhesive on the slab and at the outcome of solidification it forms a single body between lower side of the box and then of the tile, the adhesive for the flooring and the screed.
