U-GLOW is a non-toxic, non-flammable glowing liquid, as found in light sticks, being shot out of a squirt gun or super soaker.

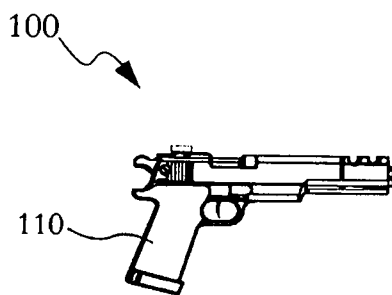

Figure 1

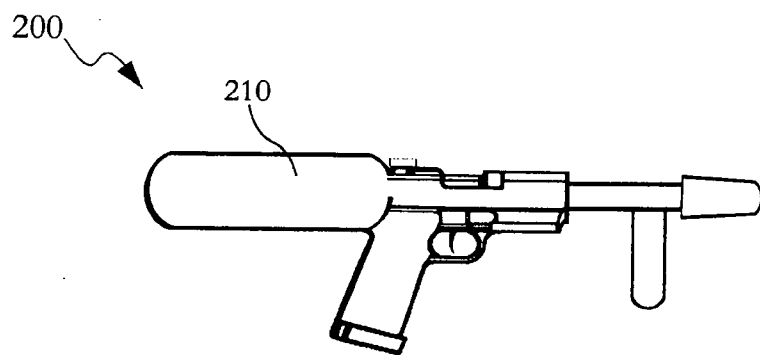

Figure 2

**ULTRAVIOLET WATER GUN****BACKGROUND OF THE INVENTION**

**[0001]** 1. Field of Invention

**[0002]** The present invention relates to an ultraviolet water gun.

**[0003]** 2. Description of Related Art

**[0004]** When playing games with others, it can be difficult to see at night if a target has been hit. The ultraviolet water gun utilizes a modified liquid for use in toy squirt guns.

**BRIEF DESCRIPTION OF DRAWINGS**

**[0005]** FIG. 1 illustrates a side view of an ultraviolet water pistol, according to an embodiment of the present invention.

**[0006]** FIG. 2 illustrates a side view an ultraviolet water rifle, according to an embodiment of the present invention.

**DETAIL DESCRIPTION**

**[0007]** FIG. 1 illustrates a side view of an ultraviolet water pistol **100**, according to an embodiment of the present invention.

**[0008]** The ultraviolet water pistol **100** includes an ultraviolet liquid **110**. The ultraviolet liquid **110** is contained and dispersed by the ultraviolet water pistol **100**.

**[0009]** FIG. 2 illustrates a side view an ultraviolet water rifle **200**, according to an embodiment of the present inven-

tion. An ultraviolet liquid **210** is contained and dispersed by the ultraviolet water rifle **200** and is similar to the ultraviolet liquid **110** that is contained and dispersed by the ultraviolet water pistol **100** illustrated and described in FIG. 1.

**[0010]** Comprised of nontoxic and non-flammable materials, the ultraviolet water pistol and the ultraviolet water rifle are lightweight and glow in the dark. To be used in lieu of water, simply place in the chamber of a standard water pistol, pull the trigger and watch as the intended target is illuminated. The ultraviolet water rifle and the ultraviolet water pistol has a plurality of light sticks that are available in a wide variety of colors, including blue, green, orange, red and yellow. Children are among the many people who may find the ultraviolet water pistol and the ultraviolet water rifle both fun and easy to use. The ultraviolet water rifle and the ultraviolet water pistol features a non-toxic and non-flammable ultraviolet liquid used in a squirt gun. The ultraviolet water pistol and the ultraviolet water rifle are designed to have a refill cartridge, ensuring that users have a back-up supply.

What is claimed is:

1. A ultraviolet water pistol, comprising:  
an ultraviolet liquid, the ultraviolet liquid is contained and dispersed by the ultraviolet water pistol.
2. An ultraviolet water rifle, comprising:  
an ultraviolet liquid, the ultraviolet liquid is contained and dispersed by the ultraviolet water rifle.
