(54) Title: ACTION FIGURE WITH MOVABLE APPENDAGES

(57) Abstract: An action figure is provided having movable appendages. The action figure includes a body having a plurality of appendages including a first appendage configured to rotate about a first axis and a second appendage configured to rotate about a second axis. The action figure further includes a first movement assembly configured to drive movement of the first appendage and a second movement assembly configured to drive movement of the second appendage. At least one of the first and second movement assemblies is configured to delay movement of a corresponding appendage.
