(54) Title: AUTO-GENERATION AND AUTO-VERSIONING OF A MULTI-SOURCED DYNAMIC DOCUMENT

(57) Abstract: A computer-implementable method, system and computer media for auto-generating and auto-versioning a dynamic document are presented. In a preferred embodiment, the computer-implementable method includes populating a dynamic document with content from multiple sources. The dynamic document is then version named in accordance with a nomenclature rule that identifies a source and version of content from the multiple sources. In response to a content from one or more of the multiple sources changing at a source, the dynamic document is updated with updated content, and a version name of the dynamic document is updated to reflect the updated content.
