UNITED STATES PATENT OFFICE.

ALBERT DAVID SANDERS, OF EVANSTON, ILLINOIS.

DESIGN FOR A FLUSHING-TANK.

SPECIFICATION forming part of Design No. 22,209, dated February 7, 1893.
Application filed December 22, 1892. Serial No. 466,097. Term of patent 7 years.

To all whom it may concern:

Be it known that I, ALBERT DAVID SANDERS, a citizen of the United States, residing at Evanston, in the county of Cook and State of Illinois, have invented and produced a new and original Design for Tanks for Flushing Water-Closets and Urinals, of which the following is a specification, reference being had to the accompanying drawings, forming a part thereof.

Figure 1 is a perspective view of a tank showing my design. Fig. 2 is a sectional view of same.

The leading features of my design consist in an outwardly rolling and rounded upper extremity of the front and ends and rounded corners where the front a, ends c, and bottom b, are joined to each other, thus presenting to the eye a rounded effect to all joints and corners of the tank which are exposed to view.

What I claim is:

The herein described design for flushing tanks, the same consisting of the front a and bottom b and ends c, rounded at all external points of contact, and the outwardly rolling and rounded form of the front a and ends c, at their upper extremities, substantially as shown in the accompanying drawings.

ALBERT DAVID SANDERS.
