(54) Title: ILLUMINABLE APPARATUS AND METHOD OF OPERATING SAME

(57) Abstract: An illuminable apparatus including a thematic structure (12) configured with an operably closed chamber (30) and defining an opening (32) between an exterior of the structure (12) and the operably closed chamber (30) of the structure, and an electric circuit (80) operably connects the light source (70) to a power source (90) to allow the light source to provide luminescence viewable through the opening in the structure. The electric circuit includes a sensor (102) for sensing motion of air passing through the opening in the structure; and further includes a light source control apparatus (100) connected to the sensor for controlling the luminescence provided by the light source. The light source control apparatus is configured to change the luminescence provided by the light source when the motion of air is sensed through the opening in the structure. A method of operating such an illuminable apparatus to produce controlled levels of illumination is also provided.

— *as to the applicant's entitlement to claim the priority of the earlier application (Rule 4.17(iii))*

**(88) Date of publication of the international search report:**

28 September 2006

**Published:**

— *with international search report*

— *before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments*

*For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.*

**INTERNATIONAL SEARCH REPORT**

International application No.  
PCT/US05/09021

**A. CLASSIFICATION OF SUBJECT MATTER**  
IPC: F21V 23/04( 2006.01)

USPC: 362/392,806,808,810 446/476-477,484-485  
According to International Patent Classification (IPC) or to both national classification and IPC

**B. FIELDS SEARCHED**

Minimum documentation searched (classification system followed by classification symbols)  
U.S. : 362/392, 806, 808, 810; 446/476-477, 446/484-485

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

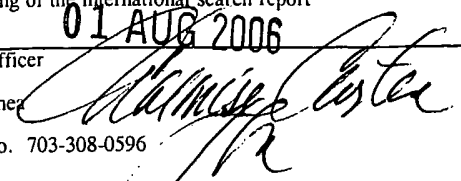

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)  
East text search tool.

**C. DOCUMENTS CONSIDERED TO BE RELEVANT**

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
Y,P	US 2004/0203317 (Small) 14 October 2004 (14.10.2004), specifications.	1-21
Y	US 5,582,478 (Ambrosino) 10 December 1996 (10.12.1996), figure 2.	1-21
Y	US 3,479,561 (Janning), 18 November 1969 (18.11.1969), specification.	1, 2, 4, 5, 8, 9, 11 and 21

Further documents are listed in the continuation of Box C.  See patent family annex.

* Special categories of cited documents:	"T"	later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"A" document defining the general state of the art which is not considered to be of particular relevance	"X"	document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"E" earlier application or patent published on or after the international filing date	"Y"	document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)	"&"	document member of the same patent family
"O" document referring to an oral disclosure, use, exhibition or other means		
"P" document published prior to the international filing date but later than the priority date claimed
