UNITED STATES PATENT OFFICE.

JOHN WOOD, OF WASHINGTON, DISTRICT OF COLUMBIA.

DESIGN FOR A SPOON.

SPECIFICATION forming part of Design No. 22,092, dated January 3, 1893.
Application filed December 9, 1892. Serial No. 454,685. Term of patent 7 years.

To all whom it may concern:

Be it known that I, JOHN WOOD, a citizen of the United States, and a resident of the city of Washington, in the District of Columbia, have invented a new and original Design for a Spoon, of which the following is a specification, reference being had to the accompanying drawings, which form a part of the same.

This invention relates to a design to be imparted to or worked upon a spoon or similar article; and it consists in the configuration and ornamentation herein shown and claimed.

Figure 1 of the drawings is a front view of a spoon having my design and Fig. 2 is a side view of the same.

The leading or characteristic feature of my design consists in the representation of a spoon-shaped tip surmounted by an acorn-shaped tip lying upon the superior extremity of the handle in substantial parallelism with the plane of the bowl with the curved portion of the shoe outward and the calks projecting in their conventional position in a direction at right angles to the face of the handle. The tip of the handle carries outside the horseshoe the representation of a slightly flattened acorn in its cup or burr, the said cup portion of the acorn-shaped tip seemingly springing away from the curved portion of the horseshoe. The lower members of the horseshoe rest upon a flattened and broadened extension of the handle expanding outward from each edge of the central line of the same.

In the drawings "A" represent the horse-shoe-shaped feature of the handle, "B" the flattened acorn-shaped tip surmounting the horseshoe, "C" the flattened extension of the handle "E," said extension terminating upon each edge of the handle in the projections etc. "D" represents the heel calks of the shoe and "a" the toe-calk thereof. E' represents that portion of the handle resting beneath the shoe.

I claim:

The design for a spoon substantially as shown and described.

JOHN WOOD.
