United States Patent Office.

JOHN SALISBURY AND BENJAMIN WILBUR, OF SCITUATE, RHODE ISLAND.

Letters Patent No. 109,058, dated November 8, 1870, antedated October 26, 1870.

IMPROVEMENT IN STOOLS AND TRAVELING-BAGS.

The Schedule referred to in these Letters Patent and making part of the same.

We, JOHN SALISBURY and BENJAMIN WILBUR, of Scituate, in the county of Providence and State of Rhode Island, have invented certain Improvements in Combined Stool and Traveling-Bag, of which the following is a specification.

Our invention relates to the combination of a stool and traveling-bag in such a manner that the said traveling-bag, by having its ends made of wood or other material, and firmly joined together with one or more standards, will thus become a stool.

Figure 1 is a side elevation of our invention.

Figure 2 is a sectional view of the same.

A is a traveling-bag, constructed of material generally used for that purpose, having the ends B B made of wood or other material, in any convenient form, and joined firmly together with one or more standard-pieces C.

The ends B B of said bag, being joined together by the standard-piece C, will make the stool C B, which is in combination with the traveling-bag; therefore, said traveling-bag, by being placed upon either end B B, will become a seat.

D is the handle of the combined stool and traveling-bag.

What we claim as our improvement is—

The stool and traveling-bag, when constructed of the parts B B and C with the flexible material A, and arranged in the manner described.

JOHN SALISBURY.
BENJAMIN WILBUR.
