(54) Title: IMPROVED MULTI-CELL TANK FOR PRESSURISED GAS

(57) Abstract: The present invention relates to a tank for pressurised gas composed of multiple cells joined by means of connection plates (P), in which each cell (C) is composed of a tubular body sealed at the two ends by means of two caps (2) and the adjacent cells communicate in pairs through a series of ducts, which comprises one or more radial ducts (5) obtained on the head (2a) of each cap (2), annular ducts (9) that surround the head (2a) of each cap (2) and transversal holes (10) obtained on the connection plates (P) and designed to provide communication between the adjacent pairs of annular ducts (9).

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"G" document member of the same patent family
