(54) Title: GROMMET CLOSURE DEVICE

FIG. 4

(57) Abstract: A grommet closure device (1) for sealing a cable opening in a raised floor, the device comprising: a frame structure defining an aperture; and a sealing member (13) having flexible sealing means (14) attached along its length in cantilever fashion, the sealing member being arranged to span the aperture such that unattached ends of the sealing means can extend away from the sealing member and rest on the frame structure, thereby covering the aperture.

A. CLASSIFICATION OF SUBJECT MATTER
INV. E04F15/024 H02G3/18
ADD.

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
E04F H02G

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
