(54) Title of the Invention: **Device with "approval" input**
Abstract Title: **Device with "approval" input**

(57) The display may include a support for release-ably supporting a display device in communication with a surface. The display device may include a product announcement holder for displaying a product announcement. An input may be in communication with an input/output circuit and may be operable by a user to indicate a user approval. The approvals may be stored and analyzed. Finally, the display may include a counter display.
