(54) **Buffer layer for improving control of layer thickness**

(57) A pad layer disposed on a semiconductor substrate 102 and a buffer layer 108 disposed within the pad layer such that the pad layer is divided into a dielectric layer 106 below the buffer layer and a mask layer 110 above the buffer layer. A method of forming layers with uniform planarity and thickness on a semiconductor chip includes the steps of providing a substrate having

a thermal pad 106 formed thereon, forming a dielectric layer 106 on the thermal pad, forming a buffer layer 108 on the dielectric layer wherein the buffer layer is made from a different material than the dielectric layer and forming a mask layer 110 on the buffer layer wherein the buffer layer is made from a different material than the mask layer.
