06100 Porvoo (FI)**

(74) Representative: **LEITZINGER OY
Tammasaarekatu 1
00180 Helsinki (FI)**

(54) **Connector for an overhead cable**

(57) A connector for an overhead cable, comprising a clamping bolt or screw (8, 8') and at least three connector blocks (1, 2, 3), which are pressable by the clamping bolt or screw (8, 8') towards each other. The connector blocks (1, 2, 3) provide therebetween two intermediate spaces for receiving wires on either side of the middle connector block (2). At least one connector block (2), which lies between the other two connector blocks (1, 3), has embedded therein metallic connecting pieces provided with teeth protruding into said intermediate spaces, which teeth, as a result of compressing the connector blocks by means of the clamping bolt or screw (8, 8'), penetrate through the wire insulation enabling a connecting piece (10) to establish an electric connection between superimposed or parallel wires in both intermediate spaces.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 01 66 0053

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
