(57) **ABSTRACT**

A new garden type *Chrysanthemum* plant named  
'CIFZ0075' particularly distinguished by its medium to  
large size plant with round mound plant habit, a medium size  
decorative flower (2.0 inch), yellow flower color and a  
natural season response of early September.

Latin name of the genus and species of the plant claimed:

*Chrysanthemum x morifolium*.

Varietal denomination: 'CIFZ0075'.

**BACKGROUND OF THE NEW PLANT**

The present invention comprises a new *Chrysanthemum*,  
botanically known as *Chrysanthemum x morifolium*, and  
hereinafter referred to by the variety name 'CIFZ0075'.

'CIFZ0075' is a product of a planned breeding program.  
The new cultivar has a medium to large size plant with round  
mound plant habit, a medium size decorative flower (2.0  
inch), yellow flower color and a natural season response of  
early September.

'CIFZ0075' originated from a cross made in January 2014  
in Tenjo, Colombia. Seeds were sown in June 2015 in  
Gilroy, Calif. and 'CIFZ0075' was selected from the result-  
ing population on September 28 in Monroeville, N.J.

The female parent was the variety 'Syelect Ambe', U.S.  
Plant Pat. No. 22,770.

The male parent was 'CIFZ0013', U.S. Plant Pat. No.  
25,878.

The first act of asexual reproduction of 'CIFZ0075' was  
accomplished when vegetative stem cuttings were propa-  
gated from the initial selection in January 2016 in Mebane,  
N.C.

**BRIEF SUMMARY OF INVENTION**

Horticultural examination of plants grown from cuttings  
of the plant initiated in January 2016 and continuing there-  
after has demonstrated that the combination of characteris-  
tics as herein disclosed for 'CIFZ0075' are firmly fixed and  
are retained through successive generations of asexual  
reproduction.

'CIFZ0075' has not been observed under all possible  
environmental conditions. The phenotype may vary signifi-  
cantly with variations in environment such as temperature,  
light intensity and day length.

A Plant Breeder's Right for this cultivar has not yet been  
applied for. 'CIFZ0075' has not been made publicly avail-  
able prior to the effective filing date of this application,  
notwithstanding any disclosure that may have been made  
less than one year prior to the effective filing date of this  
application by the inventor or another who obtained  
'CIFZ0075' directly from the inventor.

The following traits have been repeatedly observed and are determined to be basic characteristics of the new variety. The combination of these characteristics distinguishes this *Chrysanthemum* as a new and distinct variety.

BRIEF DESCRIPTION OF THE PHOTOGRAPHS

The accompanying photographic drawings show typical flower and foliage characteristics of ‘CIFZ0075’ with colors being as true as possible with an illustration of this type.

The photographic drawing shows in FIG. 1 a close view of flower of the new variety and in

FIG. 2 a flowering plant from an outdoor trial.

The aforementioned photographs, FIG. 1, as well as FIG. 2, were taken in September 2019, both showing a plant from the same black cloth indoor trial in Gilroy, Calif. These plants were about 10 weeks of age. One rooted cutting per pot had been planted in a one gallon pot, not pinched in week 24, and black clothed from week 25. Plants started flowering the end of August.

DETAILED BOTANICAL DESCRIPTION

The measurements were taken in Gilroy, Calif. in September 2019 on the plants from the aforementioned trial.

Color references are made to The Royal Horticultural Society Colour Chart (R.H.S.) 2015.
